Autumn 2016

Dear plant lovers,

Welcome to our Autumn 2016 plant list.

Starting with bad news,,,,, propagation of Dionysias was disappointing again. Just sufficient young plants to keep my collection up to date, but as usual we offer a wide range of unusual alpines for different garden situations.

Some new Androsace species are for sale, with highlights the very rare A.bryomorpha from Pamir mts., the reintroduction A. wardii from China and Tibet and a few unnamed species from Tibet. Plants of the highly desirable Phlox nana from New Mexico are looking promising. Viola delphinantha, V.kosaninii, V.tianschanica and V.doerflerii and some new selected Sax.oppositifolia seedlings are available and of course many plants from S. Amerika like Oxalis species, Junellia species,just to mention a few. Many desirable species are still available in limited numbers from last year .

Several species are in very short supply, so please add substitutes with your order.

Orders will be shipped from of the beginning of September.

We wish you a good growing plant season.

Ger & Mariet

Ordering information

Visits

Visits to my nursery and garden are welcomed, even on Sundays; I shall be pleased to make an appointment.

Horst is situated in the southeast of the Netherlands and is easily reached via motorway A 73.

Growing conditions

In my lists I usually indicate my views as to the most general desired conditions (which will be in conformity with many other experts views) but :

hardiness and successful growing is certainly not only dependent on temperature/climatic conditions or even the plant's own physical properties, but also [and often] mainly on the combination with other factors. In practice quite a few plants, theoretically condemned to an alpine house, do very well outside, be it just with winter protection. Only by experience can be ascertained what they can endure, what they could endure.

Try a few plants in different conditions / places, dividing the risks, gather experience with a quite interesting match. There will be no harm of course to apply a bit of common sense.

Post and Packing Charges

1 - 5 plants € 12,-

6 - 11 plants € 20,-

11 - 25 plants € 24,-

Over 25 plants will be charged by weight. To cut down expenses, all plants will be dispatched without pots, wrapped in peat moss and tinfoil.

Dionysias in small clay pots. Very important to list some substitutes!!!

We do our utmost for the best possible packing, based upon our experience, though we cannot guarantee of course safe arrival. So far we had no complaints whatsoever.

Payment

Cashing cheques has proved sometimes to be very cumbersome and expensive, therefore only cash payment please along with your order in a registered letter.

Important

Please fill in your name and address on your order clearly, to avoid any delivery problem of the plants.
